

EAGLE CREEK WATERSHED MANAGEMENT PLAN:
AN INTEGRATED APPROACH TO IMPROVED WATER QUALITY

Eagle Creek Watershed Alliance

A coalition including:

Eagle Creek Watershed Taskforce
Central Indiana Water Resources Partnership
2005

Center for Earth and Environmental Science

Lenore P. Tedesco
Denise Lani Pascual
Lora K. Shrake
Leda R. Casey
Bob E. Hall
Philippe G.F. Vidon
F. Vincent Hernly
Robert C. Barr

Eagle Creek Watershed Taskforce
John Ulmer

Veolia Water Indianapolis, LCC
Dale Pershing

TABLE OF CONTENTS

SECTION I: EXECUTIVE SUMMARY	1
SECTION II: PROJECT INTRODUCTION	3
Designating the Study Area	3
Building Partnerships	3
Missions	4
The Eagle Creek Watershed Task Force	4
The Eagle Creek Watershed Alliance	4
History of Eagle Creek Watershed Management Efforts	5
1995 and 1996	5
1997	5
1997 – 2002	6
2002 – 2003	6
2004 – 2005	6
A History of Eagle Creek Watershed Research Efforts	6
SECTION III: PHYSICAL SETTING OF EAGLE CREEK WATERSHED	9
Geological and Climatological Description of Central Indiana and Eagle Creek Watershed	9
Indiana’s Climate Setting and Climate Change	9
Central Indiana’s Geologic and Physiographic Setting	13
Eagle Creek Watershed’s Geologic and Physiographic Setting	15
Description of Eagle Creek Watershed and Reservoir	23
Eagle Creek Watershed and Reservoir	23
SECTION IV: LAND-USE AND LAND COVER DESCRIPTION OF EAGLE CREEK WATERSHED	31
Landuse History	31
Demographic History	32
Land-use Data	32
1985 Land-use Data	33
2000 Land-use Data	34
Land-Cover Change Analysis 1985-2000	34
Land-use Change Predictions 2000-2040	34
2002 – 2003 Land-use Data	37
Slope and Elevation	41
Impervious Surface Analysis	43
Recreation Areas	47
Farming Practices	47
Tillage Practices	48
Agricultural Chemicals	50
Tile Drains	58
SECTION V: INVESTIGATION OF WATER QUALITY ISSUES IN EAGLE CREEK WATERSHED	59
Indiana Department of Environmental Management Data	59
Designated Uses	60

Impaired Waterbodies.....	61
Eagle Creek Watershed Task Force (ECWTF) Monitoring Study.....	61
Central Indiana Water Resources Partnership (CIWRP) Studies.....	63
Marion County Health Department (MCHD) Water Quality Data.....	67
Veolia Water/USFilter/IWC Data.....	67
Indiana Heartland Model Implementation Project (IHMIP).....	68
Indiana Department of Environmental Management Zooplankton Study.....	68
Eagle Creek Watershed Biomonitoring Study.....	68
<i>E. coli</i> Impairment Study.....	70
<i>E.coli</i> DNA-Ribotyping Study.....	70
U.S. Geological Survey National Water Quality Assessment: White River Basin, Indiana	71
Adequate Woody Riparian Buffer Assessment Study (ArcView GIS).....	74
Land-Use Perturbation Study.....	74
Watershed Survey.....	75
Streambank Erosion.....	77
Adequate Stream Buffer.....	79
Livestock Access.....	80
Trash.....	82
Tile/Pipe Discharge.....	84
NPDES Point Source Data.....	86
Septic Systems.....	91
INCAA Unsewered Communities Report.....	91
Boone County Department of Health Septic System Field Survey.....	94
Stream Order Classification.....	94
SECTION VI: SUBWATERSHED ASSESSMENT.....	97
Assessment Methodology.....	97
IDEM’s 303(d) Impaired Waterbodies List.....	97
Water Quality Data.....	98
Atrazine Application Assessment.....	102
Nutrient, Suspended Sediment, and <i>E. coli</i> Loading Assessment.....	103
Biological Assessment.....	105
Land-use Perturbation Assessment.....	105
Watershed Visual Assessment.....	106
Adequate Woody Riparian Zone Assessment (ArcView GIS).....	109
Impervious Surface Assessment.....	110
Location of Point Sources Assessment (NPDES).....	111
Unsewered Communities Assessment.....	111
Headwater Stream Assessment.....	112
Results of Assessment.....	113
SECTION VII: DEVELOPMENT OF PROBLEM STATEMENTS AND THREAT IDENTIFICATION.....	118
Concerns and Problem Statements.....	118
Concerns.....	118
Problem Statements.....	119

SECTION VIII: CRITICAL AREAS IDENTIFICATION AND PRIORITIZATION 123

 Critical Areas Identification..... 123

 Criteria 1 and Criteria 2: Level of Degradation and Level of Vulnerability 123

 Feasibility Evaluation 132

 Priorities..... 132

 Locating Sites for Remediation 134

 Subwatershed Prioritization 134

SECTION IX: WATERSHED MANAGEMENT GOALS 136

SECTION X: WATERSHED MANAGEMENT PLAN IMPLEMENTATION..... 149

 Water Quality Action Register..... 149

 Education and Outreach Action Register..... 150

SECTION XI: MONITORING INDICATORS..... 154

 Measuring Water Quality Improvements (Goals 1 – 4)..... 154

 Administrative Indicators of Success..... 154

 Ground Truth Indicators of Success 154

 Goal 1: Reduce E. coli loads in Eagle Creek Watershed to meet water quality standards.
..... 155

 Goal 2: Reduce Atrazine loads in Eagle Creek Watershed..... 158

 Goal 3: Reduce Total Suspended Sediment loads in Eagle Creek Watershed to meet
water quality standards. 160

 Goal 4: Reduce nutrient loads in Eagle Creek Watershed to meet water quality
standards. 163

 Measuring Education and Outreach Achievements..... 165

 Goal 5: Increase education and outreach in Eagle Creek Watershed. 165

SECTION XII: ADAPTING AND EVALUATING THE PLAN: ESTABLISHING LONG-
TERM SUSTAINABILITY..... 167

SECTION XIII: REFERENCES CITED 168

APPENDIX A: HISTORY OF EAGLE CREEK WATERSHED TASK FORCE 174

APPENDIX B: EAGLE CREEK WATERSHED ALLIANCE 176

APPENDIX C: WINDSHIELD SURVEY 177

APPENDIX D: BENCHMARK ANALYSIS 178

APPENDIX E: ANNUAL LOAD REDUCTION WORKSHEET 181

LIST OF FIGURES

Figure II-1: Eagle Creek Watershed in relation to the Upper White River Watershed 4

Figure III-1: (A) Average annual temperature in degrees Fahrenheit (°F). (B) Average annual
precipitation in inches (1931-1980). Modified from Clark, 1980. 9

Figure III-2: Average Monthly Precipitation in Indiana. Demand is defined as
Evapotranspiration. Newman, 1997..... 10

Figure III-3: Average Precipitation Runoff in Indiana. Clark, 1980. 10

Figure III-4: Indiana’s Hydrologic Cycle. Clark, 1980 11

Figure III-5: Climate Change Data (A) Global Temperature Changes (EPA, 1998), (B)
Climate Change Trends for Central Indiana (Newman, 1997). 12

Figure III-6 Bedrock Geology Map for Indiana. Clark, 1980..... 13

Figure III-7: Extent and Retreat of Glacial Ice in Indiana. A and B Depict the Maximum Extent of Two Previous Glaciations. The Glacial Ice Completely Retreated from Indiana Between these two Glaciations and the Wisconsinan Glaciations Depicted in image C, D, & E. Image C depicts the Maximum Extent of the Last Glaciation. Images D-F Depict the Retreat of Glacial Ice and Generalized Deposits (Wayne, 1966). 14

Figure III-8: Indiana’s Natural Regions..... 17

Figure III-9: Average slope in Indiana. Waldrip and Roberts, 1972 18

Figure III-10: Drainage Characteristics of Indiana Soils. Clark, 1980 18

Figure III-11: Erosion Potential of Indiana Soils. Clark, 1980..... 19

Figure III-12: Eagle Creek Watershed - Bedrock Geology 20

Figure III-13: Eagle Creek Watershed – Surficial Deposits 21

Figure III-14: Eagle Creek Watershed – Soil Associations 22

Figure III-15: Upper White River Watershed..... 25

Figure III-16: Indianapolis Drinking Water Reservoirs and Their Watersheds 26

Figure III-17: Eagle Creek Watershed – Subwatersheds, Political Boundaries, and location of USGS Gage # 03353200 on Eagle Creek. 27

Figure III-18: Eagle Creek Monthly Mean Streamflow (Zionsville, IN; USGS Gage 03353200; 1957-2002; Figure III-17)..... 28

Figure III-19: Eagle Creek Reservoir overlay of Eagle Creek and valley (1941), showing the location of the 56th St. Causeway opening and the original location of streambed. Black arrow shows location of land bridge opening. Yellow arrow shows pre-flood Eagle Creek streambed. 29

Figure IV-1: Indiana Wetland Losses (A) Historic Wetlands in Indiana and (B) 1986 Wetlands in Indiana (Robb, 2002). 31

Figure IV-2: Eagle Creek Subwatershed Areas by Land Cover Type (1985 & 2000) 35

Figure IV-3: LUCI Model Prediction of Urbanization in Eagle Creek Watershed (2000 – 2040) 36

Figure IV-4: Eagle Creek Watershed 2002-2003 Land Cover 40

Figure IV-5: Eagle Creek Watershed – Slope Delineation..... 42

Figure IV-6: Diagram showing the effect of increasing urbanization on run-off (©IUPUI Visual and Interactive Spaces Lab/CEES 2005). A – Natural land cover of forest and herbaceous plants. B – Low density urban land cover. C – High density urban land cover. ↑ = evapotranspiration; ↓ = infiltration; and ⇄ = run-off. 44

Figure IV-7: Eagle Creek Watershed – Impervious Surfaces..... 46

Figure IV-8: Tillage Practices by County (Percent) (Indiana Division of Soil Conservation, 2003 and 2004) 49

Figure V-1: Eagle Creek Watershed Sampling Stations..... 64

Figure V-2: Seasonal concentration of nitrate near mouth of White River (reproduced from Fenelon, 1998) 72

Figure V-3: Sources of nitrogen to White River Basin (reproduced from Fenelon, 1998) ... 72

Figure V-4: Nitrate concentrations in soils related to soil drainage (reproduced from Fenelon, 1998) 73

Figure V-5: Phosphorous and ammonia concentrations in urban areas (reproduced from Fenelon, 1998) 73

Figure V-6: 2003 single family permits issued per township. Yellow borders denote location of 3,000+ home development in Fishback Creek (Eagle Creek Reservoir) subwatershed..... 76

Figure V-7: Visual Assessment – Stream Buffer and Streambank Erosion 78

Figure V-8: Visual Assessment – Livestock Access, Observed Confined Feeding, NPDES Confined Animal Feeding Operations (CAFOs) 81

Figure V-9: Visual Assessment - Trash 83

Figure V-10: Visual Assessment – Location of Tile/Pipes Observed in Watershed 85

Figure V-11: NPDES Point Sources in Eagle Creek Watershed 88

Figure V-12: Confined Animal Feeding Operations in Eagle Creek Watershed..... 90

Figure V-13: Unsewered Homes in Eagle Creek Watershed..... 93

Figure V-14: Hierarchical stream classification developed by Horton (1945) as modified by Strahler (1952, 1964). 95

Figure VIII-1: Determination of Critical Areas Evaluation Tool (Flow Chart) 125

LIST OF TABLES

Table III-1: Eagle Creek Subwatersheds and the Associated Drainage Area.....	28
Table III-2: Morphological Data for Eagle Creek Reservoir.....	30
Table IV-1: Eagle Creek Watershed Demographic History	33
Table IV-2: Eagle Creek Watershed Area Change by Land Cover Type (1985 & 2000).....	34
Table IV-3: Predicted Urbanization by Subwatersheds (2000-2040).....	36
Table IV-4: Comparison of 1985, 2000, and 2002-2003 Land Cover Assessment.....	37
Table IV-5: Eagle Creek Subwatersheds 2002-2003 Land-use Data	38
Table IV-6: Elevation and Percent slope statistics for all sub-watersheds in Eagle Creek Watershed.	41
Table IV-7: Continuum of Land-use/Land Cover Imperviousness	44
Table IV-8: Eagle Creek Subwatersheds – Impervious Surface Analysis.....	45
Table IV-9: Recreational Areas in Eagle Creek Watershed	47
Table IV-10: Corn and Soybean Acreage and Tillage Practices	48
Table IV-11: Estimated 2002 Fertilizer Application in Eagle Creek Subwatersheds	52
Table IV-12: Estimated 2002 Herbicide Application in Eagle Creek Subwatersheds	53
Table V-1: Eagle Creek Watershed 14 Digit HUC Subwatershed 303(d) Listing (IDEM 2002, 2004).	62
Table V-2: Mean Water Quality Values for ECWTF Data (May 1997 – October 2003)	63
Table V-3: Mean Water Quality Values for CIWRP Data (February 2003 – December 2003)	66
Table V-4: T.W. Moses Drinking Water Intake Atrazine (0.003 mg/L) Levels	67
Table V-5: Subwatershed Normalized IBI Scores.....	69
Table V-6: Normalized IBI Scores	69
Table V-7: Apportionment of <i>E. coli</i> to sources based on DNA Ribotyping.....	71
Table V-8: Percent of Stream with Adequate Woody Riparian Buffer	74
Table V-9: NPDES Point Sources in Eagle Creek Watershed	87
Table V-10: Confined Animal Feeding Operations in Eagle Creek Watershed.....	89
Table V-11: List of Unsewered Communities in Eagle Creek Watershed by County	92
Table V-12: Stream Classification and Stream Length	96
Table VI-1: Subwatershed Ranking Based on IDEM 303(d) List.....	98
Table VI-2: Summary of ECW data sets used in Benchmark Assessment.....	99
Table VI-3: Tiers for Water Quality Benchmark Assessment.....	101
Table VI-4: Subwatershed Ranking by Tier Scores	102
Table VI-5: Subwatershed Ranking by Atrazine	103
Table VI-6: Subwatershed Ranking by Load.....	104
Table VI-7: Subwatershed Rank by <i>E. coli</i> Load	104
Table VI-8: Subwatershed Ranking by Bioassessment	105
Table VI-9: Subwatershed Ranking by Land-use Perturbation	106
Table VI-10: Subwatershed Ranking by Degree of Stream Bank Erosion.....	107
Table VI-11: Subwatershed Ranking by Percent of Stream with Adequate Buffer	107
Table VI-12: Subwatershed Ranking by Livestock Access to Stream	108
Table VI-13: Subwatershed Ranking by Trash in Stream	108
Table VI-14: Subwatershed Ranking by Number of Tile/Pipe Discharges.....	109
Table VI-15: Subwatershed Ranking by Adequate Woody Riparian Zone.....	110

Table VI-16: Subwatershed Ranking by Impervious Surface Assessment 110

Table VI-17: Subwatershed Rank by Number of NPDES and CAFO Sources that Discharge into the Stream 111

Table VI-18: Subwatershed Rank by Number of Unsewered Homes 112

Table VI-19: Subwatershed Rank by Headwater Stream Classification 112

Table VI-20: Determination of Subwatershed Rank Score 116

Table VI-21: ECW Subwatershed Rankings. Lowest ranking subwatersheds are shaded.. 117

Table VIII-1: Identifying Critical Areas Based on Criteria 1 and Criteria 2 126

Table VIII-2: Priorities for Eagle Creek Watershed 133

Table VIII-3: Subwatershed Prioritization..... 134

Table X-1: Action Register 151

ACRONYMS

BMP	-	Best Management Practices
CAFO	-	Concentrated Animal Feeding Operation
